

Industry 4.0 Special Shows

Industry 4.0—the special shows at automatica will bring Industry 4.0 to life and show actual applications of what used to be just a buzzword. What is already possible today and what technologies or applications will shape the automation domain in the future? What market opportunities will result from this development? Our show cases offer both insights and an outlook.

OPC UA Demonstrator

The next level of standardized and manufacturer-independent data exchange for more connectivity: the OPC UA demonstrator by VDMA R+A.
